Art Unit: 1731

The election of species requirement is repeated and made Final.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

Claims 1-10 are rejected under 35 U.S.C. 102((a) or (e)) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over WO 99/05108.

See Page 55, Example (g) for (N,N,N',N'-Tetramethyl-N,N'-bis-[3-(1-oxyl-2,2,6,6-tetramethylpiperidin-4-yloxy)-propyl]-hexamethylenediammonium Dibromide. This is the same compound as the elected species. See Example 1 and Abstract, for using 0.5 to 0.1% of the elected species for preventing loss of brightness and for enhancing resistance to yellowing of a lignin containing pulp, e.g. chemimechanical and thermomechanical. See Abstract for adding UV

absorbers and polymeric inhibitors and metal chelating agents as coadditives. Any difference would have been an obvious modification of WO 99/05108.

Applicant states that the instant process differs from that of WO 99/05108. However, the rejection was based on 102 or 103. Even if the species of WO 99/05108 differs from that of the instant Application, such a difference would have been an obvious modification of the species of WO 99/05108. Besides the claims call for a sub-group "m" attached to the compound. When "m" is a hydroxyl group it would not differ from the species of WO 99/05108. During a telephone conversation with Applicant's attorney, Mr. Hall, on June 7, 2001 a provisional election was made with traverse to prosecute the species VIII, e.g. the species of Example 18 drawn to: (N,N,N',N'-Tetramethyl-N,N'-bis-[3-(1-oxyl-2,2,6,6-tetramethylpiperidin-4-yloxy)-propyl]-hexamethylenediammonium Dibromide. The species (N,N,N',N'-Tetramethyl-N,N'-bis-[3-(1-oxyl-2,2,6,6-tetramethylpiperidin-4-yloxy)-propyl]-hexamethylenediammonium Dibromide was searched. Changing the species of claim 18 effectively changes the species claimed. The claims would be drawn to a non-elected species, e.g. the species added by the September 17, 2001 amendment. Such is improper. The claims must be drawn to the elected species.

Claims 1-10 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification has been amended by changing the compound of

Art Unit: 1731

Example 18. Such an amendment changes the scope of the claims when read in view of the specification.

The amendment filed September 17, 2001 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The specification has been amended by changing the compound of Example 18.

Applicant is required to cancel the new matter in the reply to this Office action.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
